

[Future Events Fall Of China](#)

Postby [HP Mageson666](#) » Fri Sep 28, 2018 1:30 pm

The situation in the world is such. Trump has put major tariffs on China to combat the economic warfare that it has been waging on America for decades. This has created a system of escalation on China's side that has left the leader of China in a situation he can't win. Due to the nature of his rule he can't afford to lose or back down. Experts on China have pointed out the simple fact China can't win this trade war and the escalation of economic warfare with America. Europe is now stepping in and also pushing against China as well. It's been stated by experts on the subject the Chinese Communist Party can't stand up against this. The nature of this struggle and its escalation and how it connects to internal politics within China is going to lead to the total collapse of the Communist Party of China.

China has been attacking American planes and ships in the South China Sea as part of their claims to the Islands in the region claimed by Japan. These are aggressive acts of war. It might come down to the Chinese Communist Party could start a war to stay in power. That is a war China can not win but it could cause the collapse of the American dollar if it goes badly for America and American allies. But it will end in the collapse of the Communist Party in my opinion as the effects of such a war to China might speed up the conditions of the looming collapse. The conflict might not happen but it might. Much of China is bluster but the current leader might go that far. China can't survive an embargo from America, almost of all Chinese economy is based on trade with America. So what would a war with America and America's NATO allies such as Japan bring them. China is doomed to collapse and that is the end of the Communist regime.

The American sanctions on Iran might also bring about the collapse of the Islamic Regime of Iran as well. Soon it will bring the ability of Iran to sell oil to zero and that is it. There are major riots in Iran against the Islamic regime calling for the end of the Mullahs. China has stepped in to buy Iran's oil however this means the American sanctions will also target China and thus speed up the looming collapse of Communist China. Our RTR's are moving through all of this and directing. Trump was the leader our RTR's brought into being and he might bring about the collapse of the last major base of the enemy Communist China. The one base the Jews still have and plan to use to wage war on the nations to bring about a Communist world government.

Also to add the economic collapse of Iran might force the regime into a war in the ME with America and its allies in the region. That is a possibility. The Iranian regime is shooting its citizens down in the streets now over the rioting against their regime. It's only going to get worse if the embargo's are placed on China over this and the Iranian economy is going to look like Venezuela. As the European nations have bowed to Trump's embargo on Iran as well. Maybe the Iranians will buckle and give in like North Korea. The collapse of the Islamic regime in Iran will be a major blow to Islamic rule in the world as well. The whole program is coming apart. The Catholic Church is collapsing as well so is Christianity in general.

With the Final RTR done daily in our life times we will see the liberation of earth.

Something to consider the fall of the Islamic regime in Iran will end the rule forced Islamic indoctrination and religious law. That means the religious police will be gone and all this forcing of the Iranians to pour their spiritual power into the enemy program will be gone. The Iranians were betrayed after they overthrew the Shah by the Mullah faction of the revolution. The goal was to create a secular style free government. Then the Mullah faction overthrew that and declared an Islamic Theocracy instead.

With the Islamic regime gone this will open the door for the return of the Iranian cultural movements that want to restore Paganism into Iran and return to pre Islamic more Vedic ideals. The Iranians hate Islam as a alien ideology imposed on them by an alien regime and have had a long cultural war against it. This will allow Islam to be swept away in time out one of the largest if not the largest nation in the ME population wise.

I'm happy about the tariffs. China has been poisoning many countries with tainted foods, vaccines for babies and children that cause autism and inferior and toxic pharmaceuticals and much more, from cookware with toxic Teflon, etc.

To answer questions,
ME is an abbreviation for Middle East.
